

Language settings in BASS

You can change the language that you work with in BASS following these instructions:

1. If you use the BASS tiles page: chose the menu option Settings:

Or: If you use the BASS menu view: Settings > Preferences

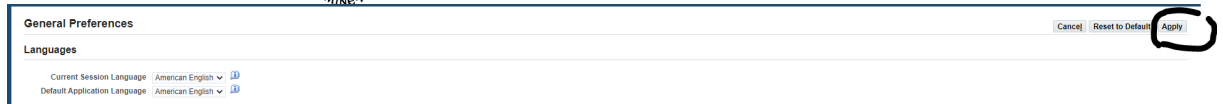

2. You will see the page General preferences
Here you can set the Default Application Language to your preferred language Dutch or American English

3. Adjust the language and click the [Apply] button on the top right of the page:

4. Close the browser and log in again in BASS. Now the language is changed according to your preference.

Attention! The log in screen is always displayed in the language that is set in Windows on your pc. So it is possible that the log in screen is in another language than the other pages in BASS.
